

INDEX TO VOL. VII.

	Page
Index of the First Six Volumes of Cambridge and Dublin Mathematical Journal	i

GEOMETRY OF TWO DIMENSIONS.

A geometrical property of curves of the third order. By <i>Thomas Cotterill</i>	14
On some properties of a parabola touching the three sides of a triangle. By <i>William B. Colman</i>	137
On the doctrine of impossibles in algebraic geometry. By <i>William Walton</i>	234
On the signs + and - in geometry (<i>continued</i>) and on the interpretation of the Equation of a curve. By <i>Prof. De Morgan</i>	242

GEOMETRY OF THREE DIMENSIONS.

On the indeterminate curvature of surfaces. By <i>William Walton</i>	1
On the circular sections of surfaces of the second order. By <i>the same</i>	7
Demonstration of Brianchon's theorem, and of an analogous property in space. By <i>Thomas Weddle</i>	10
Geometrical propositions relating to focal properties of surfaces and curves of the second order. By <i>John Walker</i>	16
On the family of the wave-surface. By <i>William Walton</i>	105
On some geometrical constructions. By <i>H. J. S. Smith</i>	118
On the singularities of surfaces. By <i>Arthur Cayley</i>	166
On the theory of skew surfaces. By <i>the same</i>	171
On certain systems in space analogous to the complete tetragon and complete quadrilateral. By <i>Thomas Weddle</i>	251
On the calculus of distances, areas, and volumes, and its relations to the other forms of space. By <i>Thomas Cotterill</i>	275

ALGEBRA AND TRIGONOMETRY.

On the theory of permutants. By <i>Arthur Cayley</i>	40
On the principles of the calculus of forms. By <i>J. J. Sylvester</i>	52
Correction of the postscript to the paper on permutants. By <i>Arthur Cayley</i>	97
On demonstrations of the binomial theorem. By <i>Homersham Cox</i>	98
On the method of vanishing groups. By <i>James Cockle</i>	114
On the knight's move at chess. By <i>Ferdinand Minding</i>	147
On the principles of the calculus of forms. By <i>J. J. Sylvester</i>	179

DIFFERENTIAL AND INTEGRAL CALCULUS.

	Page
On partial differential equations of the first order. By <i>Professor De Morgan</i>	28
On the logarithmic parabola. By the <i>Rev. J. Booth</i>	35
Laplace's equation and its analogues. By <i>Robert Carmichael</i>	126
On reciprocal methods in the differential calculus. By <i>Geo. Boole</i>	156
On certain multiple integrals connected with the theory of attractions. By <i>Arthur Cayley</i>	174

MECHANICS.

Instantaneous lines and planes in a body revolving about a fixed point. By <i>William Walton</i>	111
------------------------------------------------------------------------------------------------------------	-----

as t

ELECTRICITY.

On the laws of electricity. By <i>W. J. M. Rankine</i>	217
------------------------------------------------------------------	-----

MISCELLANEOUS.

Mathematical notes	103
On a problem in combinations. By the <i>Rev. R. R. Anstice</i>	279

Notes and other passages enclosed in brackets [], are insertions made by the Editor.

The date of actual publication of any article, or portion of an article, may be found by referring to the first page of the sheet in which it is contained.—ED.
